

## US 60 WATERLINE DESIGN AND ENVIRONMENTAL CLEARANCE

Pre-submittal Meeting 7/9/2014

All questions concerning the project must be submitted to Mr. Jarvis in writing.

The City's water system that is past its useful life. This particular project is an ADOT right-of-way for much of the pipeline.

The City was awarded \$5.5 million from WIFA to improve the water system.

Design and environmental clearance must be completed within 18 months. When the project is complete, the City should be given plans for the construction of the project.

The current funding will only be the design and environmental clearance. The project will be constructed with future funding.

The City is requesting concise qualification proposals that have followed the instructions in the RSOQ.

The approximate length of the pipeline is 2.5 miles. Roughly from the Tap Room to the Globe Mobile Home Park.

The current pipe is made of AC and cast iron and it has not been determined what size of pipe will replace the existing infrastructure.

Proposals should demonstrate that the firm and staff have the appropriate certificates (PE...).

About 20 lines of service come off the line and there are 7 laterals.
